

*I want my kids to enjoy
Sconset Beach...just as I did.*

That's why I'm voting
 *YES on April 15.*

I've studied the arguments carefully for and against the plan to save Sconset Beach. What won me over was one clear fact: if we don't act now to save Sconset, we're going to lose one of Nantucket's most precious public places.

How much evidence do we need?! Already the Lighthouse has been moved, and erosion is advancing fast. Something has to be done.

The plan to save Sconset will preserve the environment while costing taxpayers nothing. Tight controls will guarantee preservation of fishing grounds and protect public access rights to Sconset forever.

Let's face facts. Saving Sconset is a win-win for all Islanders. It preserves a vital part of Nantucket's ecosystem...and costs the taxpayers nothing!

I'm voting **YES** April 15. For myself. For my children.
